Search Notes

Dear Examiner,

Attached are the search results (from commercial databases) for your case.

Tags mark the patent/articles, which might be of interest. After you review all records including tagged and untagged records, if you wish to order the complete text of any record, please submit request(s) directly to the STIC-EIC 2600 Email Box.

Please call if you have any questions or suggestions, and I have enclosed a Search Results Feedback Form to facilitate further comments or suggestions.

Thanks
Samir Patel

Format preferred for results:
Paper

Search Topic Information:

a base that is capable of holding a tree trunk or tree with a chain or a chain like attachment means
the base having eyelets attached to the surface and a pulley or pulleys (also called pulley blocks) attached to the eyelet.
the base also having a storage or compartment means.

Voluntary Results Feedback Form

➤ I am an examiner in Workgroup: Example: 2663

➤ Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

➤ Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Comments:

TREES AND PROTO-METRIZABLE SPACES

A **base** B for a space is an **ortho-base** if whenever $B' (L- \text{HOOK}) B$, and $x (ELEM) (INTERSECT) B'$, then either $(INTERSECT) B'$ is open or B' contains a **base** at x . A space is proto-metrizable if it is paracompact and has an **ortho-base**.

A **tree** is an ordered set $(T, <)$ such that the set of predecessors of each element is well-ordered by $<$. The branch space of a **tree** is the set of all maximal **chains** where a basic open set consists only of all branches containing any given point of the **tree**. A space is nonarchemedian if and only if it is a subspace of the branch space of a **tree**. A collection of canonical closed subsets of a space X which is a **tree** when ordered by reverse set inclusion is cofinal in X if some branch converges to...

...Hausdorff space X : (1) X is a proto-metrizable space; (2) X admits a cofinal **tree** of canonical closed subsets such that each level is locally finite-in-itself and limit...

...of closed subsets of X to the open subsets of X such that $H (L- \text{HOOK}) S(H, K) (L- \text{HOOK}) C1 S(H, K) (L- \text{HOOK}) X - K$. A space X is strongly symmetric $M(,1)$ -normal if it has a...

... S such that: (1) if (H, K) and (H', K') are pairs with $H' (L- \text{HOOK}) S(H, K)$ and $K (L- \text{HOOK}) K'$, then $S(H', K') (L- \text{HOOK}) S(H, K)$; (2) $S(H, K)$ is canonical; and (3) $C1 S(H, K)$...

ANTENNA INSTALLATION **POLE**

ABSTRACT

PROBLEM TO BE SOLVED: To provide an antenna installation **pole** intended to facilitate the handling and to ensure the work safety.

SOLUTION: In installing an antenna A at a high place by utilizing the antenna installation **pole** 1, a **hook** part 6 is **hooked** to a **tree** branch C or the like while a **pole** part 2 is stood upright. Then while maintaining the stood upright state of the **pole** part 2, the detachable **hook** part 6 is removed from the **pole** part 2. Further, a worker strongly pulls a lifting lope 10. Since the end of the lifting lope 10 is fixed to the **base** of the **pole** part 2 via a **rope** insertion part 7 integrally provided to the **hook** part 6 in this case, the **base** of the **pole** part 2 is gradually lifted up as the lifting **rope** 10 is pulled, and an antenna A at the tip of the **pole** part 2 is lifted up attended therewith. When the antenna A reaches a prescribed height, the lifting **rope** 10 is tentatively fixed by winding the **rope** to a **tree** trunk or the like to complete the lift-up work of the antenna A.

ROUTE DISPLAY MARKER FOR AERIAL POWER TRANSMISSION LINE AND METHOD FOR
FITTING THE MARKER TO **TREE**

ABSTRACT

...route display marker by which a flag being a mark can be fitted to a **tree** at a destination point where a steel tower for an aerial power transmission line is...

...SOLUTION: The flag 12 is fitted to the upper tip side of an anchor **mast** 11 consisting of a tapered pipe made of fiber-reinforced plastic, a **rope** is suspended from a **rope** connection ring 18 attached to the lower **base** end side of the **mast** 11, and plural elastic anchor **hooks** 21 are drawn out of a halfway part of the **mast** 11 integrally in an obliquely downward total radiation symmetrical distribution type; while the elastic anchor **hooks** 21 of the **mast** 11 are anchored to branches of the **tree** from above, the **rope** 46 is drawn down to the trunk of the **tree** and tightened up in a tensed state, thereby holding the **mast** 11 so as not to fall.

ERECTED CONVEYOR DEVICE FOR COLLECTED **LOG**

ABSTRACT

PURPOSE: To simplify **rope** stretching work and impede the random movement of a carrier by winding the intermediate part of an elevating combined pull-up **rope** , wound around a second **winch** , several times around the first winding drum of the carrier so as to fit a hanging **hook** to the lower end of the pull-up **rope** suspended after winding, and winding a pull-back **rope** , wound around a second winding drum, onto a third **winch** .

...

...CONSTITUTION: A braking **rope** 7a such as a wire **rope** wound around a first **winch** 6a among three **winches** 6a, 6b, 6c adjacently fixed to a **master** column 1 is connected to the upper part of a tail column 2 through a...

...P1 and a running block P. The intermediate part of an elevating combined pull-up **rope** 7b such as a wire **rope** wound around the second **winch** 6b is wound around the first winding drum d1 of a carrier 5 several times and then suspended, and a hanging **hook** 8 is fitted to the lower end of the suspended **rope** 7b. A pull-back **rope** 7c such as a wire **rope** wound

around a second winding drum d2 is then pulled back onto the **master** column 1 side through the vertical fixed blocks P2, P2 of the tail column 2 and wound onto the third **winch** 6c.

ABSTRACT

... from both sides of the root ball, connecting the units, holding the upper parts of **rope** edge units with a **hook** of a crane and lifting the garden tree...

...of at least sides (4b) of a netlike or a sheetlike covering unit 4 with **rope** edge units 3 and kept in a state of mutually opposed **base** parts (3a) for connecting the wrapping and supporting units from both sides into a ground...

... root ball, connect the wrapping and supporting units with connecting tools 6 and 7, hold **ropes** on the side opposite to the **base** part (3a) of the **rope** edge units 3 directly or through other **ropes** or the connecting tools 6 and 7 with a **hook** of a crane and lift the garden **tree** . Furthermore, **ropes** separately slinging the trunk part are preferably held with the **hook** of the crane to perform the three-point hanging.

FILED: June 18, 1991 (19910618)
JOURNAL: Section: C, Section No. 1058, Vol. 17, No. 243, Pg. 40, May 17, 1993 (19930517)

METHOD FOR TRANSPLANTATION OF **TREE** AND **CHAIN** TEREFOR

ABSTRACT

... causing the damage of bark and destruction of soil around the root by hoisting a **tree** to be transplanted, winding a ladder-type **chain** for **tree** transplantation around the root soil, hooking a plurality of wire **ropes** on the **chain** and vertically hoisting the **tree** .
...

...to be transplanted is dug up around the root, the root is wound with a **rope** to form a root ball 3, the **tree** is subjected to trunk- winding, pruning and water-sprinkling and is hoisted for transportation. In the above process a ladder-type **chain** 5 for the transplantation of **tree** is wound around the root ball 3 of the **tree** 2, at least three wire **ropes** 6 are **hooked** to the **chain** 5 at nearly equal angular spacings and the tree is vertically hoisted with a crane or a **winch** . The **tree** can be moved, transported and inserted into a planting hole in a stably hoisted state...

... causing the damage of the bark and the destruction of the root ball 3. The **tree** -transplantation **chain** 5 is preferably a ladder-type **chain** consisting of a pair of parallelly arranged main **chains** 5a having **hooks** 5c at an end and connected with each other through a number of connection **chains** 5b leaving spaces between the connection **chains** .

Method of yarding logs for use with mono- cable system...

...involves using tension system which creates slack in cable , and
 choking equipment including chokers, hooks connected to one end of each
 choker, and stoppers along length of cable at intermittent locations

...Abstract (Basic): The method involves having a continuous loop of cable
 strung through a logging arm along a path that the logs are to be
 conveyed along. A drive system advances the continuous loop of the
 cable along the path. A tension system creates slack in the cable ,
 and choking equipment includes chokers, hooks connected to one end of
 each choker, and stoppers along the length of the cable at
 intermittent locations, used to secure felled trees or logs to the
 cable .

...

...The method involves advancing the cable using the drive system along

the path until a length of **cable** not being used to secure a **log** is available. Slack is created in the **cable** using the tension system The **cable** having slack to a **log** is then transported, and the choker is secured to the log

...Abstract (Equivalent): A mono- **cable** system for yarding **logs** comprising...

...a) a continuous loop of **cable** strung through a logging area along a path that the logs are to be conveyed...

...b) choking equipment used to secure the **logs** to the **cable** ;
(...

...c) a **base** unit; and...

...d) a power system mounted to the **base** unit for advancing the continuous loop of the **cable** along the path and producing slack in the **cable** , said power system having a drive system for advancing the **cable** along the path that the **logs** are to be conveyed and a tension system used in conjunction with the drive system to produce slack in the **cable** , wherein the tension system comprises...

...i) a **pulley** carriage assembly movably mounted to the **base** unit; and
...

...ii) a tension system motor assembly mounted to the **base** unit and connected to the **pulley** carriage assembly for advancing and retracting the **pulley** carriage assembly to create and eliminate tension in the tension system

... has inner body with vertical grooves fitting inside housing with internal vertical ribs and external hooks for cabling

...Abstract (Basic): A Christmas **tree** lamp **base** has a housing with two vertical ribs (11) diametrically opposite on the inner periphery and two tubular **hooks** (12) with vertical slits on the outside. The slits are in opposing directions. The inner body fitting inside the housing has two vertical grooves (21) mating with the ribs. The **hooks** hold the wires which join the lamp to the cabling for the tree's power...

...In another design, the **hooks** are replaced by semi-cylindrical guides over which caps are snapped, retaining the wires beneath...

...Title Terms: **HOOK** ;

Self release choker hook for use in forestry...

...has latch member with toe piece which contacts surface of log when choker hook is rotated by choker cable relative to log

...Abstract (Basic): The choker **hook** comprises a main body, a latch member having an outer end and being rotatable relative...

...position when the outer end of the latch member is forced into contact with the **log** encircled by the choker **cable** . At least one spring is operably mounted between the main body and the latch member...

...USE/ADVANTAGE - For use with a choker **cable** when encircling and transporting a felled **log** , e.g. by **winch** or aerial cableway, to lorry loading area. Safer for skidder operator, because choker **hook** does not have to be removed manually at point of log release...

...Abstract (Equivalent): A choker **hook** for use with a choker **cable** used for encircling and transporting a **log** and having a ferrule mounted on one end of said **cable** , said one end of said **cable** having a longitudinal axis, said choker **hook** comprising a main body, a latch member having an outer end and being rotatable relative...

...about an axis generally parallel to said longitudinal axis of said one

end of said **cable** when said ferrule is maintained in said ferrule pocket, said latch member moving from said...

...position when the outer end of said latch member is forced into contact with said **log** encircled by said choker **cable** .

... has screen hooked to pontoons bounding separation chamber and holding drums of loop forming ropes

...Abstract (Basic): from raft bunches and reduced losses of wood are ensured by drum on the floating **base** and by **ropes** forming a tie loop. The loop is located in the separating chamber which is fitted with a flexible screen attached to the pontoons by **hooks** .

...

...The **log** bundle is received by placing **ropes** (30,32) to form an open loop with the working **rope** (32) bearings against blocks (11,12). The half-couplings (31) are lowered and the lower branch of **rope** (32) is brought down onto the screen (34) while the **winch** drags in the **logs** into the loop. The latter reach the separation chamber (3) between pontoons (1,2), and then **ropes** (32) are removed and the **logs** are pulled to posts (15) to strip the ties. When the operators leave the posts

Rope hauling unit for logs - ...

...gives positive lowering of rope branch with empty hook using frictional transmission

...Abstract (Basic): Pendulum-type ropeway for hauling **logs** provides a positive control of **rope** branch lowering for picking up loads with the empty **hook**. The endless hauling **rope** 2 is taut by pulling the **pulley** with the **winch rope**, and then the trolley 4 is raised along the bearer **rope** 1 to which it is clamped by conventional means...

...The reversal of the **winch** slackens the hauling **rope** 2 causing trolley **pulley** 11 to turn, and the branch of **rope** 2 pulls in the end of the traction **rope** 3. The rotation of **pulley** 11 is transmitted to **pulley** 15 lowering **rope** 3 with the empty **hook**.
...

...After coupling the **hook** to the log load, the lift of the latter is made by normal procedure, and the trolley 4 is then released from bearer **rope** 1 for shifting to the spot of unloading.

Priority Applications (No Type Date): SU 2108399 A 19750226

... has struts with pulleys and cables with hooks on both ends to tighten pack by gravity

...Abstract (Basic): Log packing mechanism comprises base with struts having locks on which semi-rigid struts are hung (e.g. chains). To pull the pack tight by gravity and for better safety, the struts have pulleys with cables through them and hooks on both ends, interacting with the chains and forming closed loops. There is a supporting traverse at the bottom on the chains with flexible ties at both ends, passed through the chain links. One end of the flexible tie is fixed on the traverse and the other...

... Chains (10) are passed through flexible ties (11) and hung on locks (9). The chains and traverse (12) are suspended. Timber (16) is loaded. When half full, the middle support is bound up. Hooks (6) are fitted in the side tie loops and hooks (5) to the top end, so that free links remain on the ends of strap (10). The locks of traverse (12) are opened in pairs. The pack drops, cables (4) are tightened and the pack tightens itself under its own weight. The ends of

**Tis' the Season for Holiday Safety; The SAFE KIDS Coalition of Southeastern
Pennsylvania Led by The Children's Hospital of Philadelphia Offers
Holiday Safety Tips**

PR NEWSWIRE

December 06, 2000

JOURNAL CODE: WPRW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 623

(USE FORMAT 7 OR 9 FOR FULLTEXT)

... recommends the following tips to keep your holiday season safe:
Lights and Candles -- Decorate your **tree** using only UL (Underwriters' Lab
Inc.) approved lights and cords. Inspect lights for exposed or...

... loose connections or broken sockets. Do not overload extension cords.
Use no more than three **strings** of lights on one extension cord, and never
run an electrical cord under a carpet...

...sure to secure electrical cords so that children cannot pull on them and
topple the **tree** . Keep toddlers away from electrical fixtures and install
outlet covers on electrical sockets when they...

... Avoid small plastic outlet covers as they may pose a choking hazard. --
Turn off the **tree** lights when you go to bed, depart from home or leave
the **tree** in an unattended room. -- Keep burning candles out of children's
reach; keep matches and...

... escape routes from each room of your home and identify an outside
meeting place. Christmas **Trees** -- If you choose to buy a natural **tree** ,
look for the freshest **tree** available. Fresh **trees** are less likely to
catch fire than older **trees** . -- Keep your natural **tree** in a container
full of water and check it daily. -- Use a wide- **based** stand to make sure
the **tree** is secure and will not fall over. -- Cover the **tree** basin with
a **tree** skirt or blanket. -- Keep the **tree** away from heat sources such
as fireplaces, radiators and heating vents. -- Cut back the lower branches
to avoid eye injuries to small children. -- Decorate your **tree** with
children in mind. Do not put breakable ornaments, ornaments with small,
detachable parts, metal **hooks** , or those that look like food or candy on
the lower branches where small children can reach them. Also, make sure
tree lights are hung out of reach of young children. -- Never burn
Christmas **tree** branches, treated wood or wrapping paper in your
fireplace. -- Dispose of your **tree** promptly after the holidays.

For more information, Gina Duchossois of The Children's Hospital of...
